

## Viewing Proof of Delivery in Dealer Station

The RouteTrak Pro™ proof of delivery system integrates with supported ECI<sup>2</sup> Web storefronts, offering Internet access to delivery dates and times as well as captured signatures. This feature was made available with Dealer Station DDMS Edition and is.D-Force Version 4.02. If you have the Dealer Station web storefront and RouteTrak Pro Version 2.0, customers can confirm delivery online instead of calling you!

After logging in, the customer can view the signature, timestamp, printed name, and quantity of boxes delivered from Order History, by following these simple steps:

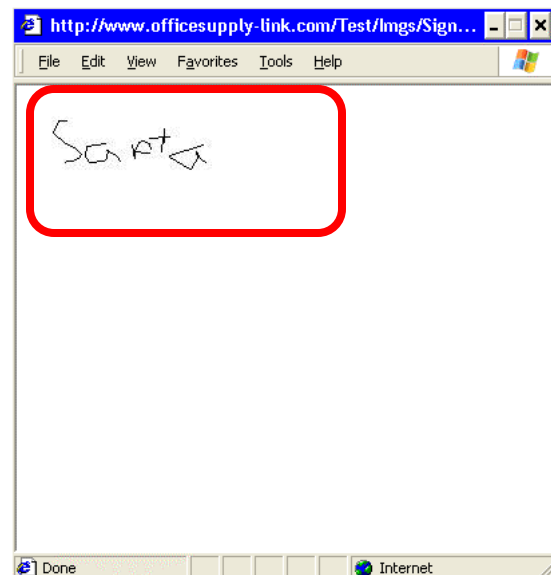

1. Click **Order History**. 
2. Open an order by clicking its order number.
3. At the bottom of the order history page, choose the desired option:

[View Signature](#)

[View/Print Invoice](#)

- Click **View Signature** to see a copy of the signature on record in a new window, as shown in the figure at right.
- Click **View/Print Invoice** to see a copy of your invoice, as shown in the figure on the following page. If the item was delivered, the timestamp, printed name, quantity of boxes delivered, and signature will be shown at the bottom of the invoice.
