

What's New in Dealer Station DDMS Edition 3.02

- **Mass Changing Customer Accounts**

You can now make mass changes without going through Customer Service. For example, if you want to change the default printer for all users to P3, you can select any range of users and change any user settings. For more information, see **Setting Up Dealer Station DDMS Edition Admin Pages, Chapter 8, User Settings on page 74.**

- **Order Time Stamping**

Dealer Station will time stamp the order when it is transmitted to DDMS. If a customer calls for an order status, the dealer can tell whether the order came into DDMS for processing by the daily cut-off deadline. For more information, see **Setting Up Dealer Station DDMS Edition Admin Pages, Chapter 1, Logging In and Out of Dealer Station DDMS Edition on page 6 or Understanding Online Purchasing, Chapter 7, Checking Out on page 39.**

- **Displaying Budgets**

You can indicate whether to display the customer's available budget on the end-user's home page. For more information see **Setting Up Dealer Station DDMS Edition Admin Pages, Chapter 5, Site Preferences on page 33, Chapter 7, Default User Account on page 54 and Chapter 8, User Accounts on page 64.**

- **Mass Emailing Selection Sort**

The account numbers on the limit page will now sort numerically, making it easier to identify the desired account number. For more information see **Setting Up Dealer Station DDMS Edition Admin Pages, Chapter 8, User Accounts on page 72.**

- **Setting Up Guest Users with Additional Information**

There are four new boxes in Default User Settings that allow for more information to be setup for guest users. For more information, see **Setting Up Dealer Station DDMS Edition Admin Pages, Chapter 7, Default User Settings on page 54.**

- **Quick Approval**

Users with approval responsibility now have a faster way to approve orders. For more information see **Understanding Online Purchasing, Chapter 5, Using the Customer Center on page 33.**
