

What's New in Dealer Station DDMS Edition 4.05

- **Mass Change**

You can change the catalogs assigned to users in mass. For more information, see **Chapter 9: User Accounts** in the handout, *Dealer Station Admin Manual*.

- **Order Approval Reasons**

When a user's order requires approval, an email is sent to the approver. That email now includes the specific reason the order must be approved. Suppose a user requires approval for non-contract items. The user places an order for 100 items, but two of them are not on the contract. The approver would receive an emailed list of the two items not on the contract.

- **Add to Cart Text**

The Add to Cart Text text box is HTML-capable. For more information, see **Chapter 2: Site Text** in the handout, *Dealer Station Admin Manual*.

- **Checkout Text**

You can add HTML code to your checkout page. The Checkout Text text box is HTML-capable. For more information, see **Chapter 6: Checkout Preferences** in the handout, *Dealer Station Admin Manual*.

- **Shipping & Handling Text**

You can add editable text to your checkout page. This box is not HTML-capable. For more information, see **Chapter 6: Checkout Preferences** in the handout, *Dealer Station Admin Manual*.
