

What's New in Dealer Station DDMS Edition 4.08

- **Customize Button Text**

You can customize the text that displays on the Change Departments and Change Attention Name buttons. This allows you to use terminology that your customers may find more familiar. For more information, see **Chapter 2: Site Text** in the handout, *Dealer Station Admin Manual*.

- **Customize Account Request Instructions**

You can customize the instructions or promotional messages using normal text or HTML for the Account Request page. New options on the Site Text page let you add, edit, and remove text above and below the Account Request form. For more information, see **Chapter 2: Site Text** in the handout, *Dealer Station Admin Manual*.

- **Assign Admin Favorites to all Departments**

When you assign Admin Favorites to an account's departments, the Admin page pulls the account's list of departments from the DDMS backend system. Previously, the drop-down selection list displayed only the first 200 departments for that account. You can now select from among all the account's departments, with no limits. For more information, see **Chapter 8: Default User Settings** and **Chapter 9: User Accounts** in the handout, *Dealer Station Admin Manual*.
